

A Digital Bus Project

for

All Grade Levels

ASSISTANCE WITH EXISTING PROJECT OR FIELD TRIP

Objective: *To add an extra level of STEM involvement for student participation during an existing school field trip or project.*

The Digital Bus can be used as a free resource for all grade level STEM projects. If your class has a planned science related field trip or school based activity, consider adding the Digital Bus to your list of activities. Teachers may use the entire resources of the Bus to create a station tailored to match your project. From a simple computer classroom to a full microscopy lab, the Digital Bus is your mobile platform to expand the possibilities of your existing project. For details about Digital Bus assistance with your project or field trip, please contact our staff.
